

## John Winter

Leading UK Foundry  
Supplier

### PF990

A Sustainable high performance release agent for all types of green sand moulding operations.

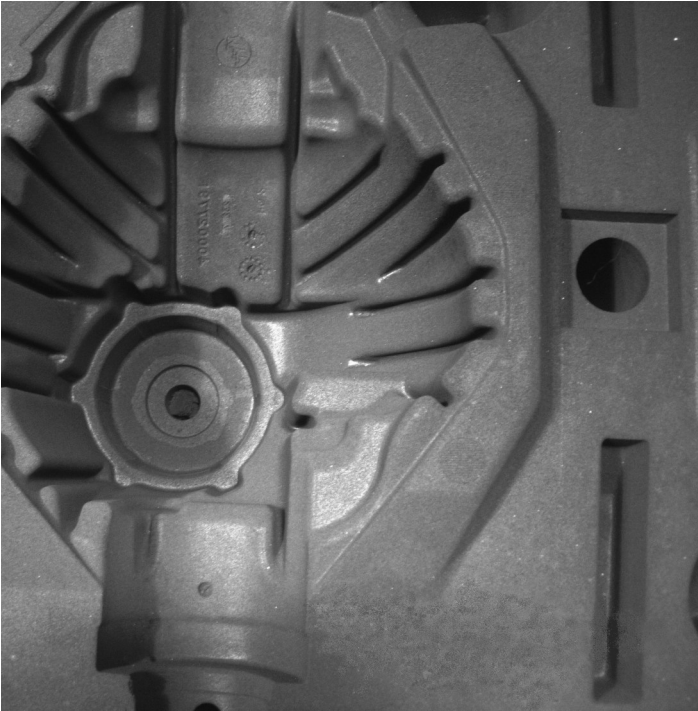

PF990 is a sustainable pattern spray for the 21st Century.

Being vegetable based it helps foundries reduce their Carbon foot print as part of the drive to reduce emissions.

PF990 lubricates metal and plastic patterns, resulting in a clean easy strip, improved mould quality and reduced uncast moulds.

WORKING BETTER TOGETHER

Differential carrier  
mould  
**PF990**

Multiple cavity turbocharge housing mould

**Used in: All Greensand foundries**

1. Sustainable & Biodegradable
2. Contains no VOCs (Boiling Point  $>250^{\circ}\text{C}$  @101.3 KPa )
3. Low viscosity enables a fine, uniform coating resulting in low consumption rates
4. Non-Hazardous - high flash point  $>160^{\circ}\text{C}$
5. Low odour making it an operator-friendly product
